

Maurice Ward Manufacturing has achieved TS16949 status since 2009.

We have a full team of quality engineers and can provide a full PPAP analysis if required.

Within our laboratory we have the capability to test parts using the following equipment

- **Coordinated Measuring Machine (Sheffield Pioneer).**
- **Gloss meters.**
- **Colour meters**
- **MFI Testers**
- **Shadow Graph**
- **Micrometer**
- **Many specialised measuring jigs and fixtures.**
- **SPC software – a selection of our moulding machines are networked and the data is centrally processed.**

Our quality supply record to our customers is of the highest quality. However in the unlikely event of any issue occurring we pride ourselves on our responsiveness and flexibility.
