

At Maurice Ward & Co s.r.o. we have considerable experience in assembly of many different types. We have assembled Hard Disk Drives, TV parts, plastic part assembly and metal part assembly amongst others.

We have assembled in dust free and anti static environments and we can prepare areas suitable to your requirements. We have experience handling complex BOMs and we can provide traceability of all parts using our stock control software ULMS. This software has been utilised by Maurice Ward s.r.o. to handle the stock control and warehouse management for some of the world's leading companies.

Our staff are experienced at fast ramp up of projects and we will look at any proposal with interest. We often use our experience gained in the more technological areas of moulding and robotic painting to provide innovative solution to automation of assembly parts and to streamline the process.
